

ABSTRACT OF THE DISCLOSURE

An outer circumferential portion 24 of a finger support 10 of a first handle portion 6 includes a receptacle portion 25, an inner end 26, and an outer end 27. A joint portion 8 of a first blade 1 is received in the receptacle portion 25. The inner end 26 extends from the receptacle portion 25 over a range in which the finger support 10 of the first handle portion 6 and a finger support 11 of a second handle portion 7 face each other with the first blade 1 and a second blade 2 held in a closed state. The outer end 27 extends from the inner end 26 to the receptacle portion 25. The outer end 27 of the finger support 10 of the first handle portion 6 has an intermediate section 29, a first section 30, and a second section 31. An embedded joint portion 21 is embedded in the finger support 10 of the first handle portion 6 at the joint portion 8 of the first blade 1 and exposed from the intermediate section 29. The first section 30 and the second section 31 extend from the intermediate section 29 to the receptacle portion 25 and the inner end 26, respectively, with the intermediate section 29 arranged between the first and second sections 30, 31. The finger support 10 of the first handle portion 6 includes outer cover portions 32, 39 each serving as a finger contact portion. The outer cover portion 32 and the outer cover portion 39 are formed in the first section 30 and the second section 31, respectively, for covering the embedded joint portion 21 of the first blade 1.
